

TOP 3 goals of Security Services Operations

Quantum Cybersecurity Skills have anonymously surveyed 50 global Security Operations Centers (SOC) to find out their priorities and asked participants to identify the purpose of their SOC. Our approach is to focus on optimizing Security Services Operations and deliver it through people, processes and technology to address business needs.

Basic SOC: detect, analyze and respond to threats

47% SOC's have the maximum capacity to be optimized

Mean
Time to
Detect

Mean
Time to
Respond

Mean
Time to
Recovery

Advanced SOC: reduce risk, mitigate, managing security information

35% SOC's should improve few key angles how their service is delivered

Dynamic SOC: analytics, prediction

9% Most advanced SOC's - a step away from improving operational dynamics
